

PROMOTIONAL CONTENT HUB

FIRST PHASE

INGEST WORKSPACE

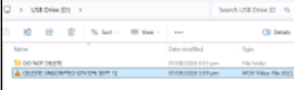

This is where PCS logs all material ingest requests from PSD, particularly for programs, platforms, and channels that do not edit or publish on the 4th Floor, such as GMA News, Program Management, International Channels, Kapuso Foundation, GMA Music, GMA Pictures, RGMA, Regional TV, and others.

As the first step in the workflow, PCS is requesting an application that will allow program clients, PCS, and Content Management (CM) to collaborate on material ingest requests. The goal is to eliminate the need for manual advisories between PSD and PCS, as well as between PCS and CM, replacing the current Viber and Messenger exchanges.

Sample:

Link: [INGEST](#)

INGEST WORKSPACE

A. To Be Filled Out by PSD

1. PROGRAM / PROJECT

- Leave this as an open field for PSD to provide the name of the program or project for the materials to be uploaded/ingested.
Examples: GGV, The Baker King, PCO Plug – DENR, Kapuso Foundation – Palawan Pay Plug
- Make this a blank field that can be filled out by PSD.

2. PLATFORM

- Make this a dropdown list containing the platforms below. The list should be editable so PCS can add new platforms as needed.
 - GMA
 - GTV
 - HOA
 - IHM
 - GPTV
 - GLTV
 - GNTV
 - GMAI Marketing
 - Regional TV
 - Synergy
 - GMA Pictures
 - GMA Music
 - RGMA
 - Sparkle
 - Digital

3. BILLABLE PARTY

- Make this a blank field so that PSD can enter the appropriate billable party for their request.

INGEST WORKSPACE

A. To Be Filled Out by PSD (Continuation)

4. EPISODE/BREAK DATE

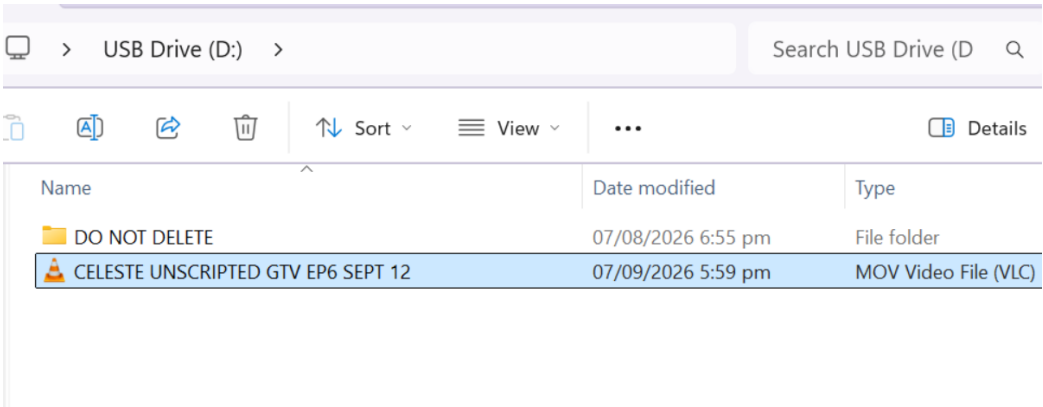

- Leave this as an open field for PSD to provide the **Episode Date** of the program or the **Break Date** of the project.

5. SOURCE

- Make this a blank field so PSD can indicate the source of the materials.
- The source may be an **EHD, USB, or OneDrive link**.

6. NUMBER OF MATERIALS TO BE UPLOADED/INGESTED OR SCREENSHOT OF MATERIALS TO BE UPLOADED/INGESTED

- Our initial request is for PSD to upload a **screenshot of the materials requested for ingest**, as shown in the sample screenshot below.

- If providing an image or screenshot is not feasible, leave this as an open field for PSD to indicate the **number of materials** to be uploaded/ingested.

7. REQUESTED BY

- Leave this as an open field for PSD to provide the **name of the requestor**.

INGEST WORKSPACE

B. To Be Filled Out by PCS

1. DESTINATION FOLDER

- Leave this as an open field for PCS to provide the appropriate **destination folder in AMS/Curator** for the requested materials.

2. APPROVED BY:

- Provide a clickable **APPROVED** button for PCS to trigger and forward the request to CM for upload/ingest.
- Include an open field for PCS or OCS to provide the **name of the approver**.

C. To Be Filled Out by CM

1. STATUS

- Provide a dropdown list with the following options for CM to update PCS on the status of the request:
 - **DONE**
 - **NON-COMPLIANT** – If the material/s is non-compliant, provide a blank field for CM to indicate the reason for the non-compliance.
- Include an **audit trail or timestamp** to track when the status was updated.

INGEST WORKSPACE

OTHER REQUESTS:

- **Limited Access for PSD:** Limited access will be provided to PSD members who regularly submit ingest requests to Post. They will be given access to log their requests and forward them directly to Post with the click of a button.
- **Post Notification and Approval:** PCS will receive a notification once a request is forwarded by PSD. PCS will then assess and approve the request by clicking the **APPROVED** button, which will automatically forward the approved request to Content Management (CM).
- **CM Task Completion Notification:** Once the ingest and transfer of materials are completed, CM will click a button to notify both PCS and PSD that the task has been completed.
- **Non-Compliant Material Logging:** PCS is also requesting a feature that will allow CM to log information in the app whenever materials are found to be non-compliant. This will allow PCS and PSD to easily and promptly access the non-compliance report.
- **Audit Trail:** Add an audit trail feature to the INGEST HUB to track request activity, status updates, approvals, and task completion.

SECOND PHASE

PSD DAILY PLUG LIST WORKSPACE

This is where PSD logs all incoming projects/plugs on a daily basis.

A separate workspace will be dedicated to PSD for logging incoming daily plugs. This workspace will serve as the **initial entry point and primary source of information** for managing the daily projects received from PSD. The list submitted by PSD will serve as the **basis for the next day's production workload**.

As PCS reviews and completes the required details, the information will be carried over to the **Workload Workspace** for monitoring, scheduling, and project tracking. The finalized details will then be used to prepare and distribute the **next day's production workload** to the concerned teams.

Logger access may be given to PSD (Neil Iguiz and Marianne Mendoza) so that they may be able to log the daily list of plugs directly in the app, rather than sending it to POST in excel format via email. We can also explore the possibility of copy-pasting files directly from Excel worksheets to the app.

Sample of the current PSD plug list:

THIRD PHASE

WORKLOAD WORKSPACE

Currently, this is the primary workload sheet that the PCS Prep Team updates daily. It contains the plug list submitted by PSD each day. The team updates key project details, such as the locations of voice-overs, scripts, artwork/storyboards, and audio guides. The target preview/break dates are also noted in this sheet for monitoring and scheduling purposes. It also indicates whether a project requires pre-production, identifies the assigned compositing team (VEDIT or VGFX), and includes other relevant notes for the VGFX and VEDIT teams. The team also monitors and notes incomplete plug requirements that need to be followed up with the concerned team.

Details for radio and audio guides are also maintained in a separate tab for the Audio workload.

This sheet serves as the **main source of information for the daily workloads distributed to VEDIT, VGFX, and Audio**. It is also used for **daily logs, reports, and other production details**, which are carried over to the **PCS Ongoing Team sheet** for monitoring and preparation of the next day's production workload.

Sample and current PCS main workload:

Link: [WORKLOAD](#)

WORKLOAD WORKSPACE FOR PCS HUB

- This is where the bulk of the tasks will be managed, as it will contain the main workload. The idea is for PCS to input the script details into the main workload, as is currently done, while the system automatically segregates the relevant information into different tabs. These tabs will then be distributed to, or made accessible to, the concerned units (VEDIT/VGFX/AUDIO) or teams (ONGOING TEAM/ENDORSEMENT TEAM).
- The following are PCS's requests, agreements, as well as Jun's recommendations:
 - From the **PSD Daily Plug List**, PSD (Neil Iguiz and Marianne Mendoza) will log the daily list of plugs directly into the app instead of sending the list to Post in Excel format via email. The information provided in the **PSD Daily Plug List will automatically be reflected in the Workload Workspace**, serving as the initial reference for PCS in preparing and managing the next day's production workload. We can also explore the possibility of allowing users to **copy and paste data directly from Excel worksheets into the app** to make the process faster and more efficient.
 - An additional "**UNITS CONCERNED/INVOLVED**" column will be added to our current workload which will help with the segregation of information.
 - Additional column for "**PLUG TYPE**" will be added to our current workload which will help with the segregation of information.
 - Jun will also check if the app will have a purge feature in case the storage is full and if he can devise a way to archive the contents of the app, if or when our subscription expires.

WORKLOAD WORKSPACE FOR PCS HUB

- **Other main requests from PCS are:**
 - For the app to have features that will allow us to generate reports that can be extracted via Excel.
 - For the app to be made available to multiple users at a time (at least 15 PCS members)
 - To enable the system to automatically segregate relevant information from the main workload and distribute it to the appropriate units and teams (VEDIT, VGFX, AUDIO, ONGOING TEAM, and ENDORSEMENT TEAM), thereby eliminating the need for tedious manual segregation by PCS.

WORKLOAD WORKSPACE

1. PLATFORMS (in the current workload sheet)

- Make this a dropdown list containing the platforms below. The list should be editable so PCS can add new platforms as needed.
 - GMA
 - **Sub-platforms:**
 - EG
 - GMA NEWS
 - PUBLIC AFFAIRS
 - PROGRAM MANAGEMENT
 - CORPORATE
 - KAPUSO FOUNDATION
 - GTV
 - HOA
 - IHM
 - GMA INTERNATIONAL
 - **Sub-platforms:**
 - GPTV
 - GLTV
 - GNTV
 - GMAI Marketing

1. PLATFORMS (continuation)

- AFFORDABOX
- GMA NOW
- Regional TV/TDMD/OTHERS
 - **Sub-platforms:**
 - RTV (local airing)
 - Regional airing
 - Synergy
 - GMA Pictures
 - GMA Music
 - Sparkle
 - RGMA
 - PSD-DIGITAL

WORKLOAD WORKSPACE

2. BILLABLE PARTY (Additional to the Workload sheet)

- Make this a blank field so that PCS can enter the appropriate billable party based on the script/s provided.

3. UNITS CONCERNED (Additional to the Workload sheet)

- This will indicate the concerned Operations units that will be involved in the particular project or plug.
- Provide a dropdown list with the following options:
 - VGFX Only
 - VEDIT Only
 - VGFX/VEDIT
 - Audio - RADIO
 - Audio – AUDIO GUIDE
 - VGFX/VEDIT/Audio

4. PLUG ID (in the current workload sheet)

- Automatically copied from the PSD Daily Plug List.

5. PSD (in the current workload sheet)

- Automatically copied from the PSD Daily Plug List.

6. BREAKDATE/TIME (in the current workload sheet)

- **Date:** Can either be an open field for PCS to manually enter the date or a **clickable date field/calendar** for easier date selection.
- **Time:** Open field for PCS to enter the break time.

7. VO (in the current workload sheet)

- Open field for PCS to indicate the **location/status of the voice-over**.

WORKLOAD WORKSPACE

8. SCRIPT (in the current workload sheet)

- **Date:** Can either be an open field for PCS to manually enter the date or a **clickable date field/calendar** for easier date selection.

9. ARTWORK/STB (in the current workload sheet)

- **Date:** Can either be an open field for PCS to manually enter the date or a **clickable date field/calendar** for easier date selection.

10. AUDIO GUIDE (in the current workload sheet)

- **Dropdown:** Provide the following options:
 - N/A
 - **Date** (**Date:** If applicable, provide a **clickable date field/calendar** for easier date selection.)

11. REMARKS (in the current workload sheet)

- **Open field** for PCS to enter any relevant notes, updates, or additional information regarding the project/plug.

12. TOTAL MATERIALS (in the current workload sheet)

- **Open field** for PCS to indicate the total number of materials.

13. PROG NAME/PROJ TITLE (in the current workload sheet)

- Automatically copied from the **PSD Daily Plug List**.

WORKLOAD WORKSPACE

14. PLUG TYPE (Additional to the Workload sheet)

- Make this a dropdown list containing the plug types below. The list should be editable so PCS can add new platforms as needed.
 - EPISODIC
 - RADIO PLUG
 - ENDORSEMENT
 - Pop-up / Pop logo
 - LED
 - AVP/Sampler
 - Bumper
 - Character
 - Countdown
 - Finale
 - Image
 - Interstitials
 - Launch
 - MTV
 - Omni
 - PSA/ROS
 - Schedule plug
 - Seasonal
 - SID
 - Standard
 - Tactical
 - Teaser
 - Trailer
 - TCARD/TITLE LOGO

WORKLOAD WORKSPACE AT A GLANCE

Currently, the **Audio workload is maintained in a separate tab**. However, if the upcoming PCS Hub can extract and filter the required Audio details directly from the **Main Workload Sheet**, there may no longer be a need to maintain a separate Audio workload tab.

The following details are required by the Audio team and are already included in the Main Workload Sheet:

- **Platform**
- **Billable Party**
- **Unit Concerned**
 - **Audio – Radio**
 - **Audio – Audio Guide**
- **Plug ID**
- **PSD**
- **VO**
- **Script**
- **Remarks**
- **Plug Type**

The PCS Hub should ideally allow the Audio team to filter or extract projects based on their Audio-related requirements directly from the Main Workload Sheet. This would eliminate duplicate data entry and reduce the need to maintain a separate Audio workload tab.

Note:

All sample sheets for the **current and proposed Ingest, PSD Daily Plug List, and Workload** are compiled in the link below:

[FOR TMSSD_092826](#)

Thank you 😊
